Honors Baccalaureate and Celebration of Academic Excellence

North Carolina State University

May 8, 2008

McKimmon Conference and Training Center

The Alma Mater

Words by Alvin M. Fountain, '23

Music by Bonnie F. Norris, '23

**Where the winds of Dixie softly blow
O'er the fields of Caroline,**

**There stands ever cherished NC State,
As thy honored shrine.**

**So lift your voices; loudly sing
From hill to oceanside!**

**Our hearts ever hold you, NC State,
In the folds of our love and pride.**

Alexander Quarles Holladay

Medal Recipients for 2008

Raymond E. Fornes

Professor of Physics and Associate Dean for Research

Professor Raymond E. Fornes has served NC State for 38 years as faculty member and administrator. Under his leadership as Associate Dean for Research in the College of Physical and Mathematical Sciences, research funding has increased four-fold to nearly \$30 million annually. He has advocated successfully for new space for the college, including the CMAST coastal facilities, the Marye Anne Fox Undergraduate Science Laboratories, Partners III, Jordan II, Mathematics and Statistics, and the Riddick Hall renovation. Professor Fornes serves as the NCSU Counselor to the Oak Ridge Association of Universities (ORAU) and

as the University Liaison to Oak Ridge National Laboratories (ORNL). He initiated the first Undergraduate Research Symposium at NC State. His research and administrative interests have led to off-campus assignments at the American Enka Research Laboratories, NASA Jet Propulsion Laboratories/California Institute of Technology, the Government-University-Industry Research Roundtable (GUIRR) of the National Academy of Sciences/National Academy of Engineering/Institute of Medicine, and the Policy Division of the National Research Council. His primary research interest in polymer physics with emphasis on structure and properties of polymers and the influence of environmental factors on polymeric systems has led to over 120 publications and one edited volume and nearly \$8 million in research funding. He has supervised 24 Ph.D. students. His awards include the Fiber Society's Distinguished Achievement in Fiber Science Award.

Nino A. Masnari

Distinguished Professor of Electrical and Computer Engineering

Professor Nino A. Masnari has served NC State for over 28 years as faculty member, department head, research center director, and dean of the College of Engineering. During Professor Masnari's term as Head of the Department of Electrical and Computer Engineering, its undergraduate enrollment doubled and its graduate enrollment tripled. His tenure as Director of the Center for Advanced Electronic Materials Processing involved competitive awards of over \$36 million from federal and industry sources. Highlights of Professor Masnari's 10-year term as Dean of the College of Engineering include substantial growth

in undergraduate and graduate enrollments--especially enrollments of minority and female students, a four-fold increase in scholarship funding, a tripling in the number of NSF CAREER awards by engineering faculty, a tripling in College research funding, a doubling of the college's endowment, and the implementation of a plan for the transfer of the College of Engineering to the Centennial Campus. In 2007 he received the Award of Merit from the NC State Alumni Association. His national service includes serving as General Chair of the National 2000 Engineering Deans' Institute of the American Society for Engineering Education (ASEE) and Vice Chair of the ASEE Engineering Deans' Council (2004-2005). He is a Fellow of the Institute of Electrical and Electronics Engineers. Professor Masnari's research interests in semiconductor devices and circuits, electronic materials processing, fabrication technology, ion implantation, microwave solid-state devices and circuits, bipolar magnetic transistors, microwave tubes, electron beams, and plasma physics have led to 47 journal articles and over \$60 million in research funding. He has supervised 14 doctoral and 28 master's degree students.

H. Troy Nagle

Professor and Founding Chair, Joint (NCSU/UNC) Department of Biomedical Engineering, Professor of Electrical and Computer Engineering

Professor Troy Nagle has dedicated 23 years of teaching, research, and service to NC State. As founding chair of the joint NC State – UNC-CH Department of Biomedical Engineering, he led the development of the first joint department in the UNC system. During his term of office, the department has achieved an accredited undergraduate biomedical engineering program at NC State and 80 graduate students at NC State and UNC-CH in the department's joint graduate program. Prior to his work with the Department of Biomedical Engineering, Professor Nagle was an early leader in the development of the NC State computer engineering curricular program. Professor Nagle's research expertise in medical devices and microsensors, digital signal processing, design for testability, and digital control systems has led to over 60 refereed journal articles, a number of co-authored books, edited volumes, and book chapters, 11 issued and pending patents, over \$4 million in research and instructional funding, and formation of two medical device start-up companies. He has directed 8 doctoral and 23 master's degree students. He is a Fellow of the Institute of Electrical and Electronics Engineers (IEEE), serving as president in 1994 and currently as Editor-in-Chief of its new *IEEE Sensors Journal*. He is also a Fellow of the American Institute of Medical and Biological Engineering and a registered professional engineer. He has received the NASA New Technology Award and the IEEE Richard M. Emberson Award for technical contributions to the Institute.

Academic Costume

Academic gowns represent a tradition handed down from the universities of the Middle Ages. These institutions were founded by the Church; the students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards; the hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns which are different from those commonly used in this country. Some of the gowns are of bright colors and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed; the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor – long pointed sleeves; master – oblong, square cut in the back with an arc cut away in front; doctor – bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold and those for other graduate and professional degrees may be of the color corresponding to the trimmings on the hoods.

Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution which awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's, and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty. A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. The following faculties have the same color – dark blue: Anthropology, History, Languages, Literature, Philosophy, Political Science, and Sociology.
