The Alma Mater

Words by Alvin M. Fountain, '23

Music by Bonnie F. Norris, '23

**Where the winds of Dixie softly blow
O'er the fields of Caroline,**

**There stands ever cherished NC State,
As thy honored shrine.**

**So lift your voices; loudly sing
From hill to oceanside!**

**Our hearts ever hold you, NC State,
In the folds of our love and pride.**

Medal Recipients for 2009

William Adler

Alumni Distinguished Undergraduate Professor of Religious Studies

Professor William Adler has dedicated over 25 years of teaching, research, and service to NC State. His excellence in teaching has been recognized by induction into the NC State Academy of Outstanding Teachers and receipt of the Outstanding Teaching Award. At the 2009 Honors Baccalaureate he is being recognized for having been named an Alumni Distinguished Undergraduate Professor of Religious Studies. Other honors and awards he has received include the Outstanding Research Award from the NC State College of Humanities and Social Sciences, a Fulbright-Hays Visiting Lectureship at the Hebrew University, research fellowships from the Annenberg Insti-

tute, Dumbarton Oaks, the National Endowment for the Humanities, and the Center for Advanced Judaic Studies, and distinguished visiting research appointments at the University of Adelaide, Friederich-Schiller-Universität Jena, and the University of Basel. His national service includes serving as a reviewer and panelist for the National Endowment for the Humanities, as editor or co-editor of two monograph series and a professional journal, and as a member of the Executive Council of the Society of Biblical Literature. Professor Adler is a leading world expert in early Christian historiography. His celebrated, frequently cited, and widely influential monograph, *Time Immemorial: Primordial History in Christian Chronography from Julius Africanus to George Syncellus* (1989), reopened and completely redefined the field of Christian chronography. *The Chronography of George Synkellos* (2002), a joint work with Paul Tuffin of the University of Adelaide, has been praised as a “monumental academic achievement” and has also become a standard source. He was responsible for the translation and contributed to the introduction and annotations of *Julius Africanus: Chronographiae* (2007), another collaborative book that was the first in the venerable *Die griechischen christlichen Schriftsteller* series to include an English translation and notes. He is currently working on a new standard edition of Africanus’s *Kestoi* and editing Volume 2 of *The Cambridge History of the Religions of Classical Antiquity*. Professor Adler’s widely influential scholarship has put NC State on the world map in the eyes of medievalists, Byzantinists, biblical and patristic scholars, Renaissance scholars, classicists, and students of Christianity, Judaism, and the Ancient Near East.

Alan C. York

William Neal Reynolds Professor of Crop Science and Extension Weed Specialist

Professor Alan C. York has served NC State and the farmers of North Carolina and beyond for over 30 years. His excellence in all three missions of our land-grant institution—teaching, outreach and research—led to his being the first extension specialist to be appointed a William Neal Reynolds Professor. He is a North Carolina native who has spent his professional life working to help North Carolina farmers make their farms more productive and profitable. Agriculture remains an important segment of North Carolina's economy, with row crops such as corn, cotton, small grains and soybeans among the more valuable agricultural commodities the state produces.

Weed control is one of the most expensive elements involved in crop production, and effective weed control is essential for profitable farming. Dr. York has spent his career developing a strong research program along with a complementary educational extension program designed to help growers avoid weed control mistakes and to grow cotton, corn, soybeans and small grains profitably. His extensive applied research program is designed to find solutions to specific weed management problems facing growers, to develop efficacious and economically sustainable weed management programs, and to pass on what he learns to growers and those who advise growers. He has an international research reputation in weed science, publishing 97 papers in refereed research journals, 249 research abstracts, five book chapters and 242 peer-reviewed extension publications. Professor York has guided every type of student in the College of Agriculture and Life Sciences, from students in the two-year Agricultural Institute to those working toward a doctorate. For 14 years he taught the weed science course in the two-year Agricultural Institute, and he recently assumed responsibility for the weed science course in NC State's four-year program. He has served as major advisor to 27 graduate students – 20 master's and 7 Ph.D. students. His national service includes serving as Associate Editor for *Weed Technology*, *Peanut Science*, and the *Journal of Cotton Science*. He has served on the boards of directors of the Council for Agricultural Science and Technology, the Southern Weed Science Society, and the Weed Science Society of North Carolina (for which he has also served as President, Vice-President, and Secretary-Treasurer). He is a Fellow of the Weed Science Society of America and was named the 2007 Weed Scientist of the Year by the Southern Weed Science Society.

Academic Costume

Academic gowns represent a tradition handed down from the universities of the Middle Ages. These institutions were founded by the Church; the students, being clerics, were obliged to wear the prescribed gowns at all times. Round caps later became square mortarboards; the hoods, originally cowls attached to the gowns, could be slipped over the head for warmth.

Many European universities have distinctive caps and gowns which are different from those commonly used in this country. Some of the gowns are of bright colors and some are embellished with fur. A number of these may be noted in the procession.

The usual color for academic gowns in the United States is black. The bachelor's gown is worn closed; the master's and doctor's may be worn open or closed. The shape of the sleeve is the distinguishing mark of the gown: bachelor – long pointed sleeves; master – oblong, square cut in the back with an arc cut away in front; doctor – bell shaped.

Caps are black. The tassels for the Ph.D. degree are gold and those for other graduate and professional degrees may be of the color corresponding to the trimmings on the hoods.

Of all the components of the academic costume, the hood bears the heaviest symbolic burden. The hood must make clear the level of the degree, the faculty in which it was given, and the institution which awarded it. The level of the degree is shown by the size of the hood, the width of the velvet trimming, and in the case of doctors, by the shape. The bachelor's, master's, and doctor's hoods are three feet, three and one-half feet, and four feet long, respectively. The velvet trimming in the same order is two, three, and five inches and extends all around the hood on the exposed edge. This same trimming identifies the faculty in which the degree was awarded. For each faculty there is a corresponding color; so a glance at the trimming is all that is needed to identify the faculty. A partial list of the colors follows: Agriculture, maize; Architecture and Art, brown; Science, golden yellow; Economics, copper; Religion, scarlet; Speech, silver gray; Veterinary Medicine, gray; Textiles, wine red. The following faculties have the same color – dark blue: Anthropology, History, Languages, Literature, Philosophy, Political Science, and Sociology.
